Chair's overview of the past year:

The past year of Liverpool Central Research Ethics Committee has been very successful. The commitment of our members continues to show as we did not need to co-opt any members from other committees in the previous 12 months and, in addition to this, Hannah has been co-opted to other committees to ensure quoracy. This is invaluable and ensures committees can continue and applications be reviewed in a timely manner.

I would also like to thank Frank Killen and Hannah Chambers for attending 10 out of the 11 meetings last year. The large time commitment needed for each meeting is recognised and I will take this opportunity to thank everyone for their thorough reviews of all applications, comments, emails between meetings and their final acceptance of the new review forms!

The success of our committee is down to its members and over the last year we have lost some valuable members. Carmel Dersch – our social secretary, left after 5 years' service this year and Duane Mellor left after moving out of the area. Their input and discussion during meetings has been missed.

We have been very fortunate in having new members who have fitted into the committee extremely well. Ann Williams joined us from the Cheshire committee when it closed and Simon Alford joined as a new member in December.

As in previous years I have tried to raise the profile of the committee with local researchers and encouraged observers from research teams, universities and healthcare providers to attend a REC meeting. This way they can use their experience to improve their research applications, de-mystify what happens at a REC meeting and also share this with their colleagues. In the past 12 months we have had 10 observers, one of whom hoped to become a member and we have had great feedback from them on how useful it was.

PR sub committees are also still working well and we continue undertaking this sub-committee work via email. As mentioned in last year's report I took part in a pilot looking at the information required for a PR review and whether this can be reduced. The pilot has been completed and we await the results.

The HRA are also looking at systems to help improve proposals before reaching the local RECs. Pilots happened early in 2014 and we wait with anticipation the results hoping that any changes will help with the ethical review of research proposals for committee members and researchers alike.

Dr Stephen Pennefather and Helen Wong will have done their 10 years next year so will be leaving the committee at some point. Their contribution to meetings has been invaluable and Helen's ability to explain statistics and Dr Pennefather's ability to explain medical procedures and terminology has been very helpful.

Once again the committee has run smoothly this year due to the work and co-ordination of the REC manager Carol Ebenezer and REC Assistant, Anna Bannister.
