Chair's overview of the past year:

Camden and Kings Cross Research Ethics Committee strives to be friendly, hardworking and fair. We have received positive feedback from research teams who commented on our efficiency, constructive approach and helpful advice. We make every effort to support researchers and want to make sure there is an open and honest discussion and key points are covered. We now meet at our new location of Friends House, Euston Road which is convenient for researchers and our members.

Members of our committee have wide-ranging expertise. We have lay and clinical members who have skills and experience in law, paediatrics, primary and secondary care, mental health, research management, and voluntary, public and private sector organisations. The committee has expertise, in particular, in reviewing research involving children, and involving participants subject to Mental Capacity Act considerations and qualitative research and we are currently flagged in these areas alongside the standard caseload.

The quality of most of the research studies we see is good, well-considered and well presented. The changes we most often ask for are ones more to do with the information provided to potential participants: and mainly to make it more likely they will agree to take part. There is often room for improvement and it would be helpful if research teams had earlier input from patients/members of the public in developing materials for potential participants, particularly in studies involving children and those with learning difficulties. It is noticeable how helpful it is to student researchers to be accompanied by their supervisor at the meeting where their research is discussed.

Our committee continues to work well and our members are very committed and put in a lot of work in preparation for meetings, sub-committee meetings and the proportionate review caseload. Those researchers who attend our meetings see us for only a short time, but they rapidly realise that we have looked at their applications very carefully and focus on the ethical issues from a participants' perspective.

We are delighted to welcome Joelle Mak, Julia King, Georgia Mannion-Krase and Julie Taberer to our committee as new members. We are sorry to say goodbye to Beverley Taylor, Rosalind Jones and Ashley Stratton-Powell and thank them for their hard work and contribution.
