## Chair's overview of the past year:

We have continued to review a wide variety of studies, submitted by applicants with different levels of research experience. One of our most important functions, in my view, is to act as a rigorous 'critical friend' to research. It is always helpful for everyone concerned when investigators are available at our meetings for our discussion of their project. Such contact is crucial to our committee's shared learning and experience, not to mention being interesting and at times enlightening!

As with other committees, an increasing number of studies are being submitted for Proportionate Review and we are well served by the number of our members who make themselves available between meetings for this purpose.

There has recently been a reduction in our workload due to fewer studies being submitted, part of a current national trend. However, the result of the recent Options Appraisal should address this issue in the future.

As always, I am grateful to my officers and members, who give their time and come from a stimulating mix of backgrounds, which makes our meetings worthwhile – and enjoyable! Our managers consistently provide us and the applicants with friendly and efficient service. We are very much in their debt.
