## Chair's overview of the past year:

This year was my second year as Chair of Hampstead REC. I am grateful to everyone on the committee for their commitment and helpfulness.

Alka Bhayani, our co-ordinator, has moved on and Atul Patel, has joined us and helped us to keep on top of the many applications we have to review.

We strive to be a friendly helpful committee. We recognise that one of the most worrying parts of doing medical research is facing a Research Ethics Committee, especially attending a meeting. It can be a very daunting experience. I am pleased how many researchers come back to us. They will probably never get to the stage of enjoying being reviewed by a REC, but they seem to recognise that we are fair and helpful in our comments.

We continue to have the problem of students who come to us having received little or no support from their supervisors. This is the seventh year I have had to report continuing dissatisfaction with the poor support some researchers receive from their supervisors. We have had a number of researchers whose applications have been given scant scrutiny by anyone and as a result their proposals have not shown their efforts in the best light. Preferable to issuing unfavourable opinions, we prefer to provide the researcher with feedback that helps them change their proposal to one that no longer raises ethical issues. A number of times we have had to write directly to the supervisor to remind them of their responsibilities to their students and get them to provide a more appropriate level of supervision.

Having said that the quality of most of the research is good: very good indeed - well thought out and presented. The changes we most often ask for are ones more to do with the information provided to potential participants and mainly to make it more likely that they will agree to take part.

Our Committee continues to work well. I never cease to be impressed by the commitment of the members. They put in a lot of work, not only during the meeting but before hand when they read everything very carefully. Those researchers who attend our meetings see us for only a short time, but they rapidly realise that we have looked at their applications very carefully and can help them improve them still further.

We were sorry to see Reverend Mitchell go. We were pleased to welcome Dr Etchegoyen and Dr Jacobs as members of our Committee.
