### Chair's overview of the past year:

Our committee strives to be friendly, hardworking and fair. We make every effort to ensure that researchers are not daunted when they meet us, and we want to make sure that there is an open and honest discussion on points raised. We have received positive feedback from a number of research teams who commented on our positive approach and helpful advice.

Members of our committee have wide-ranging expertise. In particular, we have lay and clinical members who have skills and experience in paediatrics, qualitative research and mental capacity act work and we are currently flagged in these areas.

The quality of most of the research studies we see is good, well thought out and well presented. The changes we most often ask for are ones more to do with the information provided to potential participants: and mainly to make it more likely they will agree to take part. There is often room for improvement and it would be helpful if research teams had earlier input from patients/members of the public in developing materials for potential participants.

Our committee continues to work well and our members are very committed and put in a lot of work in preparation for meetings, sub-committee meetings and the proportionate review caseload. Those researchers who attend our meetings see us for only a short time, but they rapidly realise that we have looked at their applications very carefully and can help them improve them still further.

We are sorry to say goodbye to Alicia Etchegoyen, a committee member, and Joan Brown, our REC manager, and thank them both for their hard work. I would like to welcome Catherine Max as a new member.
